5 Honorary Degrees to be Given During 1960 Fall Convocation

Scarlet Key To Revamp

"A number of changes revamping the Scarlet Key have been, and will be instituted in this male honours society", announced Morty Zuckerman, Scarlet Key President.

All Arts, Science and Commerce students wishing to run for the Key must be in their third year. Engineering applicants must have a fourth year standing.

EXPERIENCE NEEDED

"The reason for this innovation is that we feel each member must be equipped with the experience of a senior standing before he can offer proper representation for an honours society", Zuckerman explained.

The system of honorary appointees has also been altered. In the past only six honorary appointments were made per year. Under the present administration, however, fifteen students will yearly receive honorary membership.

In the past honorary members have not followed the curriculum of duties set up for regular Key members. This year all appointees will be expected to fulfill the normal agenda of assignments.

EXECUTIVE

Morty Zuckerman, B.C.L. III, is the Scarlet Key President for the 1960-61 term. Zuckerman, a former Chairman of the McGill Winter Carnival and currently NFCUS Chairman, is a University Scholar with first class honours in law.

Marvin Wexler, B.A. 4, also a University Scholar, will hold the post of Vice-President.

Jim Hughes, B. Com. 4, was elected secretary and Michael Alexander, B. Com. 3 is acting as treasurer.

The term of future Key executives, in contradiction to former years, will run from July to July instead of the usual January to January term of office.

Professor Holcombe of the Chemistry Department is found pleading his case to colleagues Harris of the Arts Faculty, and Pugsley of the Commerce School, while Professor Mallory looks on, sure that his feet won't get wet.

All Five Profs Perish

An overflow crowd of five hundred students unmercifully drowned all five crew members of the Professors' Raft last night in the Union Ballroom.

Four professors, representing Arts, Science, Commerce, and Engineering, were stranded on an imaginary raft with only enough food for one. Each tried in vain to persuade the audience that his training made him alone worth saving.

The fifth victim was the captain of the Raft and chairman, Professor Mallory. All five seamen were neatly decked out in sailing caps for the voyage.

FIRST PLEA

Professor K. B. Callard, representing Arts, began by declaring that science has produced the great crisis of our time — nuclear weapons. Engineering is concerned largely with blowing

up everything. So the two destructive types, the scientist and the engineer, aren't worth saving.

Saving the businessman would mean continuing to pay bills and fees, and so, said Professor Callard, he must go. But Arts, he continued, teaches us to understand what "moves" Krouchtchev and to talk to Castro. With Arts, he added, we can control the bomb, and learn to accept the problems caused by the scientist, engineer, and businessman "philosophically".

SCIENCE DEFENDED

Science's representative, Dr. R. K. Holcombe claimed that Arts is only the "froth" of the university, and that its real substance is in the study of the sciences. Engineering, he stated, is for scientists trying to make money. Even then the scientist gives them the materials. Also, he declared,

the reason that half the bridges built fall down is the 50% pass mark in Engineering.

Commerce, he continued, is useless as it trains half of its graduates to enter the business world, and the other half as auditors, etc., to check up on the crooked first half.

USEFUL ENGINEERS

The next speaker, Professor P. J. Harris of Engineering, said "Engineers get things done". They are useful, and produce almost everything around us, he stated.

Science, he claimed, is outmoded as it has admitted giving all its knowledge to engineers, who can now build anything. Also, he added, any bridges which have collapsed were designed by misplaced science students.

Commerce, he said, would have nothing to do if there were no

Five Honorary Degrees will be conferred at the Founder's Day Convocation on October 6, announced Dr. James, 234 students will graduate at this time.

Dr. Wilder Penfield will receive the Honorary D. Sc. in recognition of his outstanding scientific achievements. Dr. Penfield recently retired from his post as Director of the Montreal Neurological Institute.

Dr. John Stewart Foster, who retires as Director of the Radiation Laboratory, built the only cyclotron in Canada. He is a Fellow of the Royal Society of Great Britain and an eminent physicist.

The Honorable A.K. Hugesson Q.C. will receive an Honorary Doctor of Law degree. He is a member of the Senate, Ottawa and an active senior member of the Board of Governors.

Dr. A. V. Douglas, Dean of Women and Acting Professor of Astronomy at Queen's University, will also receive an Honorary Doctor of Law degree. Dr. Douglas is a graduate of McGill University, B.A., M.Sc., Ph.D. and was for some years on the staff of McGill as Assistant Professor of Physics.

Emeritus Professorship will be conferred upon Dr. L.C. Montgomery, former Physician in Chief of the Department of Medicine of the University.

MONEY SPEAKS

Professor W. H. Pugsley, representing Commerce, began by thanking the audience of "college types" for their "unanimous" support. He then agreed that engineers have built bridges "from coast to coast, from Three Rivers to Vancouver". He added that engineers have built nothing in the last 100 years which has lasted like the pyramids.

The Artsman, he stated in triumph, has already admitted studying philosophy. The political understanding learned studying the U.N. he labelled "a spectator sport", just as Arts is "a waste of time".

"Lingua Franca"

A development facilitating the communication of ideas, friendship, and alert information around the globe has risen above the horizon. That development is the increasing use of the English language as the world's common tongue.

It is the official language in many countries. India's parliament debates in English. So does Ghana's. And while India proposes to substitute Hindi by 1965, experts believe this move most unlikely.

While retaining official-language status in lands so far distant from England, English is also becoming the second language in many others.

There are many reasons for this development. Partially, it is a legacy of British colonizing. The British carried English to India, Burma, Malaya, Ghana, Nigeria, Australia, South Africa, and, of course, North America.

Another reason is that when a language begins to catch on as the world's number one tongue, it gains adherents by this very fact. That's probably why, when Indonesia expelled the Dutch, it expelled the teaching of the Dutch language and substituted English as its second tongue.

The fact that the English are persistent tourists (and such indifferent linguists, one must add) has helped. Americans fit the same description; they travel extensively, but do not know the languages. Ergo, English is spoken — albeit sometimes fractured — in all sorts of shops around the globe.

Some even argue that the propagation of English as a spoken language is being hastened by recognition of its virtues. Prof. Otto Jespersen, quoted in a recent issue of the *Christian Science Monitor*, calls the language "energetic, businesslike and sober". Others of the same view point to the fact that some of mankind's greatest works — the King James version of the Bible and Shakespeare's poetry — were written in English.

Yes, the whole earth is helping here — helping to improve man's understanding of his fellow man.

Students, Unite!

Redpath Library's smoking room, like too many other of Old McGill's venerable institutions, has undergone some changes. In previous years, when one sought respite from "the quiet and still air of delightful studies", a visit to this smoke-filled chattering-chamber was in order. Here old friends were greeted and new ones met. Here last night's dates were discussed and tonight's were made. Here topics ran the entire gamut of intellectualism from A to B (Aristotle to Bardot). Londoners especially appreciated the dense and foggy atmosphere as a reminder of home. For all these reasons, seating space was at a premium. But, alas, this is now ended.

The benches have been removed, and guard rails have been installed on the window ledges. Several theories have been advanced for this. An engineering student, after close scrutiny, believes they were designed to prevent people from sitting on these ledges. But an athletic arts student, who aspires to the more graceful forms of life, feels that the ante-room will now be McGill's one and only ballet instruction salon. Whatever the case may be, one thing is evident: this could be McGill's answer to the problem of keeping scholars at their books. If it is, students of McGill, unite, you have nothing to lose but your seats.

Tickets are now on sale in the Union for the performance of the Royal Welsh Male Choir Tuesday at 8:30 p.m.. The North American premiere for the Choir will take place in Redpath Hall.

The price of tickets for students is \$1, faculty, \$1. Tickets will be offered to the general public on Friday, \$2.

Highlights of the evening concert will be songs by Wagner, Mendelssohn, and Offenbach. "The Battle of Jericho" will also be presented.

Letters to the Editor

Two Negatives Don't Make a Positive

Sir:

In two days, the most venerable McGill Daily rag has published as many highly commendable articles, strongly condemning its readers for their complete and utter apathy — with the traditional allusions to conformity and cosmopolitanism.

My compliments to the authors, Ann Wilson and Jim Grant, for their well-timed comments. For it is none too soon to be informing new McGill Students (as well as reminding old ones) that here is a college with NO SCHOOL SPIRIT.

Imagine the hostility one might incur (although in ignorance of the situation) if he were to attend the football game this Saturday or answer a professor's question in class. Why, such actions, (specially if performed by students who are adding a cosmopolitan strain to the campus) would be contrary to all that is McGill — conformity, apathy and disunity. Let us thank our respective deities that the Daily has prevented such a disastrous break with tradition.

For heaven's sake, let's stop being negative. What do such articles achieve besides the destruction of any vestige of "school spirit" a new student might have? Would not the columns devoted to these articles be better filled by, say, a record of McGill's past achievements (there are some, aren't there?), or an explanation of the game of football for foreign students?

I can't see how these two articles ameliorate, in any way, the situations that they deplore.

Tony Blair, B.A. 3

The "Humane" Aspects of Chemical Warfare

Sir:

Although you didn't say so it seemed to me that you would like to see chemical and biological methods of warfare abolished. Some facts that I don't think you know and which were not included in the news release that you quoted from are very important to people who might have any curiosity on the matter. The first and most important of these facts is that not all of the chemical and biological weapons kill. Now you of the great moral character may not think this important, but I do.

I think it is important because weapons which today are considered to be the most lethal (such as the nuclear weapons) are by the majority of the public accepted.

Another important fact is that the results of an atomic attack will stay in the land and in the race until long after the war that would cause this is long forgotten, while the effects of a chemical or biological attack will die out almost as soon as the battle is over. Not only this but in the case of biological weapons we can immunize our own people and hold out the cure to the members of the enemy who will join us.

Now don't get me wrong. I'm as against war as anybody, but if it does come to a war I'd rather have it fought with short term chemical and biological weapons rather than with long term atomic weapons.

I hope that when you read this you look into this matter and then give an answer.

Mike Musselman

We prefer to keep our nose out of the matter. — The Editors

Leaders are not Necessarily scholars

Sir:

Yesterday's Daily editorial recommended for the consideration of the newly-appointed S.E.C. committee that candidates for major student posts

be required to have a second class standing in order to avoid disastrous failures of so-called overactive students.

I credit the committee with the intelligence and judgment to reject such a suggestion.

In the past, as Dr. James has said, any students "in good academic standing" have been eligible to compete for executive and leadership positions. I have no doubt that this position was taken because the university realized that students should be encouraged to develop not only their intellect but their entire personality. The University often indicates that scholars are not necessarily

ily leaders, and leaders not necessarily scholars. Should third-class students be categorically denied the chance to compete for these positions? I don't think they should. Graduates will assure you that such experience is often of more real value than the difference of a few marks in a transcript.

Andy Reid,
B.A. 3.

Santa's Descent Still By Chimney

by CAROL LAING

Resolved, that Santa Claus should seek a more modern method of entrance, was the opening topic of the Novice Training Programme. Irwin Cotler, president of the Debating Union, chaired the debate, which would have been cancelled but for the lock-picking talents of Gordon Echenberg.

Seymour Glouberman, the first speaker for the affirmative, presented the need for a change. His minutes of research uncovered the fact that "all chimney-makers in America, nay, in the world, were lying idle in chimneys."

Another point brought to light was the fact that Santa Claus is suffering from a disease — the need to return to the womb is fundamental — and he uses the chimney as a means to an end.

Seymour concluded, "In summary, I have pointed out that 1... 2... 3..."

THE NEGATIVE

Sammy Gewurz opened for the negative by stating he would spend "4 minutes on a constructive speech and would reserve 1 minute for applause."

He contended that the affirmative had not produced any evidence in support of their claim of growing unemployment. However, he had definite proof to the contrary, a telegram received from the Prime Minister, reading: "Dear Sammy — There is no unemployment problem."

Moses Znaimer proclaimed that he had a plan to match the

need for change — "Install pneumatic tubes in every home". His argument was: "...poor Santa comes but once a year, down a chimney... this way here, he'll come through a tube... smooth..."

THE SUMMARY

Joyce Lecker summed up the debate. She said that she "would not give any statistics but would let the men take care of the figures." She contended that two things had been proved in the debate; firstly, debating technique was shown by the negative and "anyone can debate" as revealed by the affirmative.

The rebuttal consisted of an accusation against the negative side for attempting to intimidate the audience by means of physical exertion. (The indignant accuser held a switchblade knife menacingly in his hand.)

A house vote taken at the end of the debate decided that Santa will continue to enter via chimneys.

"How to Study", a six-week series of seminars, designed to help Arts and Science freshmen improve their methods of study will commence the week of Oct. 17. The series is sponsored by the Department of Psychology.

The lectures will cover such topics as assessment of study habits, organization of study time, effective reading, taking lecture notes, writing examinations, writing themes and reports, studying languages, and basic mathematical skills.

"How to Study" by Morgan and Deese will be the text for all lectures. Drs. Hebb, Webster, and Ferguson, assisted by other members of the Psychology department, will be giving the seminars.

Students will be divided into small groups, each under the guidance of one of the professors. The sessions will be arranged to fit the timetables of participating freshmen.

The purpose of the series is to help freshmen students adjust their study habits to the demands made upon them by university life. Participants will be shown how to organize their timetable to include enough study time, and how to make the most of this time.

Participation in these seminars will be completely voluntary.

Registration forms can be obtained from the janitor of the Arts Building. The completed forms should be left in the box in his office. Lists of groups with the names of students assigned to them will be posted in the Arts Building before October 12.

Associated with the Psychology department in presenting these lectures is the McGill Guidance Service, a professional psychological service which attempts to solve problems of an educational or vocational nature.

The service aids those who have difficulty in choosing their courses, or who feel that the work they are putting into their studies is not yielding the expected results.

Techniques are available for measuring individual skills, intellectual ability, interests, temperament, study habits, and other personal attributes. The Guidance Officer helps the client to make his decisions by presenting the information he needs about his own capabilities.

McGill students are charged a fee of twenty-five dollars, except when they have been referred to the department by a full professor. In such cases the fee is ten dollars.

Cheerleaderettes

Anyone wishing to qualify for the Cheerleaderette tryouts may still do so. To be eligible you must be an upperclass woman in good academic standing with the university and must attend the three remaining practices held in the RVC gym. The times are as follows:

Thursday, September 29 1:10-2 pm.
Monday, October 3, 1:10-3 pm.
Tuesday, October 4, 1:10-3 pm.

Participation Up In Girls' Sports

by BRYNA GREENBERG and JUDY LEVINSON

In a recent interview, Miss Bean, the faculty advisor to the Women's Athletic Association, stressed the fact that with the available facilities and good student leadership this year, there should be an excellent turn-out in women's sports. In the past years McGill has had a 27-30 p.c. participation by women in the sports programme. Miss Bean stated that the recreational aspect should be considered rather than the competitive in intramural participation. The clubs emphasize recreational activity.

INTRAMURAL SPORTS

The intramural sports programme on McGill campus has a comparatively wide participation. Under the Women's Athletic Association (W.A.A.), it provides for recreational and competitive activities for women undergraduates, and coordinates activities for various athletics. This efficient organization is accomplished by various clubs, organized by presidents and teams from residences, sororities, and faculties. Some of the sports offered are archery, badminton, basketball, bowling, fencing, golf, ice hockey, riflery, soccer, squash, skiing, and swimming (synchronized, racing, and diving.).

Several of the clubs such as fencing, riflery, and the watershow are co-ed, but they are not competitive. The McGill Outing Club is also a very popular co-ed group. Many outdoor activities, particularly skiing up North are enjoyed by M.O.C. Member each year.

INTERCOLLEGIATE SPORTS

To participate in intercollegiate competition a girl must be a non-professional athlete and registered as a student in good standing in a

degree or diploma course of not less than three years. This immediately eliminates all those who are repeating. There is a Women's Intercollegiate Athletic Union (W.I.A.U.) which provides for competition in several sports. Members of this Union include McGill, McMaster, Queens, Toronto, Western, and Ontario Agricultural College (O.A.C.). Two representatives from each member university gather several times a year to set dates for tournaments, and regulations for the coming year.

The tentative schedule for this year is as follows: tennis in Toronto: Oct. 15; outdoor archery at Queens: Oct. 22; swimming at McGill: Nov. 25 and 26; indoor archery at O.A.C. on Jan. 21; badminton at Western: Jan. 27, 28; volleyball at McMaster: Feb. 10, 11; and basketball in Toronto on Feb. 24, 25.

In the past, McGill's intercollegiate teams have been fairly successful. The swimming team won a trophy last year, and there are high hopes for this year, although Pauline McCullough, one of the better Synchronized swimmers and divers has left through graduation. With the new pool facilities at R.V.C. this year seems very promising.

Women's Sports

Schedule

THURSDAY, SEPTEMBER 29

ARCHERY: Archery practice from 2-4 pm in RVC gym.

GOLF: Intramural Golf tournament continues today at the Municipal Golf Club.

SWIMMING: Speed swimming from 5-6 pm in the Currie pool.

TENNIS: Upperclass tennis tournament continues at the McIntyre Courts.

CHEERLEADERETTES: Training session from 1-3 pm in RVC gym.

Intramural SPORTS

TOUCHFOOTBALL LEAGUE

Forsythe Relates Duties And Function Of S.A.C.

Mr. John Forsythe is the financial director of the Athletics Department and secretary of the Students Athletic Council. Questioned about the importance of the Council, in regard to its function in the University, he stated that is a body of students representing every phase of athletic activity on campus.

Thanks to the S.A.C., freshmen are introduced to all sports facilities offered by the Athletics Department. The Council also takes full responsibility for the Winter Carnival and Athletics Night and appoints chairmen for both events.

In past seasons Athletics Nights have been very successful, and it is hoped that this year's programme (which will include basketball, boxing, swimming and wrestling as well as a spectacular water show) will be bigger and better than ever. Chairman of the evening Derek Drummond spoke at freshman gatherings to introduce new students to Athletics Night as well as to McGill Athletics in general.

The Council is composed of the heads of the five principal athletic committees. Tom Steele is chairman of the Intercollegiate Athletic Council. The I.A.C. has jurisdiction over such matters as men's athletic awards, team budgets etc. The Students' Intramural Recreational Council (male representatives from each faculty) is headed by Charles Casey. Marion MacDougall is president of the Women's Athletic Association which provides recreational and competitive activities for women undergraduates. Also present at Council meetings are Harry Griffiths, Directors of the Department of Physical Education, Athletics, and Recreation; Chairman of Athletic Night, Derek Drummond, Winter Carnival Chairman John Duckworth, and McGill Daily Representative Lenny Flanz.
